

CUSTOMER ADVISORY

LCL IMPORT ADVISORY – RED SEA / SUEZ CANAL - Posted Date: December 21st, 2023

Dear Valued Client,

We hope you are doing well.

As you may be aware, the Red Sea / Suez Canal trade route is currently facing significant challenges, and these disruptions are expected to continue. In response, several steamship lines are considering rerouting cargo via the Cape of Good Hope in order to mitigate risk. Consequently, any surcharges imposed by carriers due to these route changes will, unfortunately, have to be passed on to cargo owners.

We are actively monitoring the situation and will provide updates as more information becomes available from the carriers.

For enhanced efficiency and cargo visibility, we invite you to utilize ECU360, our digital logistics platform. Should you require further assistance or alternative solutions for USEC, including expedited options via USWC like our "Xlerate" service with express IPI across the USA, please do not hesitate to contact your local teams.

We are committed to supporting you through these challenges and thank you for your understanding.

Kind regards,

Team ECU Worldwide
